The Safety Trap

A Security Expert's Secrets for Staying Safe in a Dangerous World

by Spencer Coursen

We are never in more danger than when we feel safe. *The Safety Trap* replaces that false sense of security and complacency with a plan of action to remain safe in any situation.

The Safety Trap teaches everyone how to protect themselves, their families, and those around them by being aware of realistic risks and - most importantly - being prepared for them. Surprisingly, you are actually in the most danger when you feel the safe. Simply put, feeling safe is the most dangerous thing you can do.

Author Spencer Coursen is one of the world's leading experts on security and has protected some of the biggest celebrities, business executives and professional athletes. Real world lessons from the author's career include:

"The Athlete" - A star athlete stirs a media frenzy both on and off the court. When the boundaries separating work, family, and friendships become blurred lines, it's hard to keep secrets. . . secret. Lesson: Trust but verify.

"The Diplomat" - Diplomats do most of their work overseas, often in non-permissive environments. When a situation is about to go from bad to worse, it helps to have as much of a head start as possible. Lesson: The need for protective intelligence.

"The Politician" - When you campaign in poetry but govern in prose, one of the most dangerous things a politician can hear is, "I used to be your biggest fan." Lesson: Identifying those who pose a threat vs those who express a threat.

Author Bio

SPENCER COURSEN is a nationally recognized threat management expert and author of *The Safety Trap* (St. Martin's Press, 2021.) He has an exceptional record of success in the assessment, management, and resolution of threats, conflict resolution, employee terminations, physical security assessments, expert witness testimony, policy authorship, protective intelligence, and vulnerability reduction. Mr. Coursen founded Coursen Security Group (CSG) a premier threat management firm based in Austin, Texas. CSG provides expert security assessment, consultation, and protective strategy to help organizations, public figures, and private families succeed in staying safe.

Madam

A Novel

by Phoebe Wynne

A riveting, modern gothic debut with shades of *The Secret History*, *The Stepford Wives*, and a dash of *Circe*, set at a secretive all girls' boarding school perched on a craggy Scottish peninsula.

For 150 years, high above rocky Scottish cliffs, Caldonbrae Hall has sat untouched, a beacon of excellence in an old ancestral castle. A boarding school for girls, it promises that the young women lucky enough to be admitted will emerge resilient and ready to serve society."

Into its illustrious midst steps Rose Christie: a 26-year-old Classics teacher, Caldonbrae's new head of the department, and the first hire for the school in over a decade. At first, Rose is overwhelmed to be invited into this institution, whose prestige is unrivaled. But she quickly discovers that behind the school's elitist veneer lies an impenetrable, starkly traditional culture that she struggles to reconcile with her modernist beliefs - not to mention her commitment to educating "girls for the future."

It also doesn't take long for Rose to suspect that there's more to the secret circumstances surrounding the abrupt departure of her predecessor - a woman whose ghost lingers everywhere - than anyone is willing to let on. In her search for this mysterious former teacher, Rose instead uncovers the darkness that beats at the heart of Caldonbrae, forcing her to confront the true extent of the school's nefarious purpose, and her own role in perpetuating it.

A darkly feminist tale pitched (...)

Digital Body Language

How to Build Trust and Connection, No Matter the Distance
by Erica Dhawan

From Erica Dhawan, co-author of *Get Big Things Done*, the definitive guide to communicating and connecting wherever you are.

Email replies that show up a week later. Video chats full of oops sorry no you go" and "can you hear me?!" Ambiguous text-messages. Weird punctuation you can't make heads or tails of. Is it any wonder communication takes us so much time and effort to figure out? How did we lose our innate capacity to understand each other?

Humans rely on body language to connect and build trust, but with most of our communication happening from behind a screen, traditional body language signals are no longer visible - or are they? In *Digital Body Language*, Erica Dhawan, a go-to thought leader on collaboration and a passionate communication junkie, combines cutting edge research with engaging storytelling to decode the new signals and cues that have replaced traditional body language across genders, generations, and culture. In real life, we lean in, uncross our arms, smile, nod and make eye contact to show we listen and care. Online, reading carefully is the new listening. Writing clearly is the new empathy. And a phone or video call is worth a thousand emails.

Digital Body Language will turn your daily misunderstandings into a set of collectively understood laws that foster connection, no matter the distance. Dhawan investigates a wide array of exchanges - from large conferences and video meetings to daily emails, texts, IMs, and conference calls - and offers insights and solutions to build trust and clarity to anyone in our ever changing world.

Insanity Defense

Why Our Failure to Confront Hard National Security Problems Makes Us Less Safe

by Jane Harman

An insider's account of America's ineffectual approach to some of the hardest defense and intelligence issues in the three decades since the Cold War ended

Insanity can be defined as doing the same thing over and over again but expecting a different result. As a nation, America has cycled through the same defense and intelligence issues since the end of the Cold War. In *Insanity Defense*, Congresswoman Jane Harman chronicles how four administrations have failed to confront some of the toughest national security policy issues and suggests achievable fixes that can move us toward a safer future.

The reasons for these inadequacies are varied and complex, in some cases going back generations. American leaders didn't realize soon enough that the institutions and habits formed during the Cold War were no longer effective in an increasingly multi-power world transformed by digital technology and riven by ethno-sectarian conflict. Nations freed from the fear of the Soviets no longer deferred to America as before. Yet the United States settled into a comfortable, at times arrogant, position as the lone superpower. At the same time our governing institutions, which had stayed resilient, however imperfectly, through multiple crises, began their own unraveling.

Congresswoman Harman was there--as witness, legislator, exhorter, enabler, dissident and, eventually, outside advisor and commentator. *Insanity Defense* is an insider's account of decades of American national security--of its failures and omissions--and a roadmap to making significant progress on solving these perennially difficult issues

Author Bio

JANE HARMAN resigned from Congress in 2011 to join the Wilson Center as its first female president and CEO. During her long public career, Harman has been recognized as a national expert at the nexus of security and public policy issues, and has received numerous awards for distinguished service. She is a member of the Defense Policy Board, the Homeland Security Advisory Committee, serves on the Executive Committee of the Trilateral Commission, and the Advisory Board of the Munich Security Conference. Harman co-chairs the Homeland Security Experts Group with former Homeland Security Secretary Michael Chertoff.

The Executive Order

A Novel

by David Fisher

In this one-step-ahead-of-the-headlines thriller, a reporter races to uncover a conspiracy when he learns that the post-Trump president elected to heal the nation has more sinister plans.

In a post-Trump world, a relatively unknown candidate, Ian Wrightman, is elected president to heal a nation frayed by years of extreme partisanship. When a series of coordinated terrorist attacks rock the United States, Wrightman begins to take more and more executive control in the name of protecting democracy.

But DC reporter and war veteran Rollie Stone uncovers evidence that the attacks might be coming from somewhere much closer to home. As Wrightman's executive orders turn to declarations of war and restriction of rights, Rollie is forced on the run as he tries to get the information into the right hands. But who can he trust?

In this all-too-realistic thriller inspired by the Sinclair Lewis classic, *It Can't Happen Here*, one journalist will do whatever it takes to stop his country turning from democracy to dictatorship.

Justice Is Coming

How Progressives Are Going to Take Over the Country and America Is Going to Love It

by Cenk Uygur

A manifesto that outlines the progressive vision, recent history and worldview - by the founder of The Young Turks and co-founder of Justice Democrats.

Right now, the shelves are filled with books on Donald Trump, as if everything was just hunky dory before the orange buffoon took over. Well, it wasn't. What ails America goes far beyond Trump, but don't worry - progressives are going to take over the country and America is going to love it. In fact, in many ways we already have.

In *Justice Is Coming*, The Young Turks founder Cenk Uygur presents two central ideas that counter everything we hear from pundits and politicians on a daily basis: one, progressives are correct on all of the issues, and two, America is actually a very progressive country. Millions of us know that we are not isolated individuals - we are a part of something larger, a movement that is already transforming Washington.

This compulsively readable manifesto seeks to apply the momentum we have already built to a concrete progressive agenda that activists, voters, and citizens can all rally around. It looks beyond Trump to the larger historical forces that have given us this unique political moment, and explains why we should fight, how we should fight, and how we can - and will - win.

Look out, Washington. We are building an army. This book is our battle plan.

Author Bio

CENK UYGUR is the host, founder and CEO of The Young Turks, the largest online news show in the world. He co-founded the Justice Democrats, a political action committee that has helped launch the careers of several major progressive politicians. He was previously the host of MSNBC Live," and has appeared as a commentator on CNN, ABC News, NPR, Headline News, Al Jazeera, and Fox, among others. He graduated from the Wharton School of Business at University of Pennsylvania and Columbia Law School.

Ethel Rosenberg
An American Tragedy
by Anne Sebba

New York Times bestselling author Anne Sebba's moving biography of Ethel Rosenberg, the wife and mother whose execution for espionage-related crimes defined the Cold War and horrified the world.

In June 1953, Julius and Ethel Rosenberg, a couple with two young sons, were led separately from their prison cells on Death Row and electrocuted moments apart. Both had been convicted of conspiracy to commit espionage for the Soviet Union, despite the fact that the US government was aware that the evidence against Ethel was shaky at best and based on the perjury of her own brother.

This book is the first to focus on one half of that couple for more than thirty years, and much new evidence has surfaced since then. Ethel was a bright girl who might have fulfilled her personal dream of becoming an opera singer, but instead found herself struggling with the social mores of the 1950's. She longed to be a good wife and perfect mother to her two small boys, while battling the political paranoia of the McCarthy era, anti-Semitism, misogyny, and a mother who never valued her. Because of her profound love for and loyalty to her husband, she refused to incriminate him, despite government pressure on her to do so. Instead, she courageously faced the death penalty for a crime she hadn't committed, orphaning her two young sons.

Seventy years after her trial, this is the first time Ethel's (...)

Wanting

The Power of Mimetic Desire in Everyday Life

by Luke Burgis

A groundbreaking exploration of why we want what we want, and a toolkit for freeing ourselves from chasing unfulfilling desires

As an undergraduate studying philosophy at Stanford, Peter Thiel met French polymath Rene Girard and was introduced to his theory of mimetic desire" - the idea that most human wanting comes from imitating what other people desire, rather than from an innate sense of need. Inducted into the Academie Francaise as the "Darwin of the social sciences," Girard is largely unknown outside academic circles. But because of Girard, Thiel knew that Facebook would thrive because it offered a window into people's curated presentation of the best parts of their lives, thereby satisfying our need to look for "models" who tell us what to desire.

According to Girard, each of us is surrounded by people who generate, shape, and manipulate our desires at every turn. Mimetic desire is no mere tool of advertisers but a reality that affects our daily lives in romance, work, fitness, politics, and parenting. Mimetic desire is a secret, unacknowledged, sophisticated form of adult imitation that drives a larger degree of human behavior than anybody ever realized.

The consequences of mimetic desire are startling. Because people learn to want what other people want, they are easily drawn into rivalries and conflict. According to Girard, people don't fight because they want different things; they fight because, though mimetic desire, they start to want the same things. But mimetic desire does not have to be in control. We are free to choose. And those who understand mimetic desire have a tremendous advantage over those (...)

Haven Point

A Novel

by Virginia Hume

A sweeping debut novel about the generations of a family that spends summers in a seaside enclave on Maine's rocky coastline, for fans of Elin Hilderbrand, Beatriz Williams, and Sarah Blake.

In 1944, Maren Larsen is a blonde beauty from a small Minnesota farming town, determined to do her part to help the war effort - and to see the world beyond her family's cornfields. As a cadet nurse at Walter Reed Medical Center, she's swept off her feet by Dr. Oliver Demarest, a handsome Boston Brahmin whose family spends summers in an insular community on the rocky coast of Maine.

Maren soon discovers that the residents of Haven Point are skeptical of newcomers, and their quick wartime marriage raises eyebrows. Although the chilly reception gives her pause, Maren can't deny the charm of the old house on the cliff, and she vows to make Oliver's family her own.

But during the summer of 1970, tragedy strikes otherwise idyllic Haven Point - and in the aftermath, Oliver and Maren's seventeen-year-old daughter, Annie, vows never to return.

Nearly fifty years later, Maren's granddaughter, Skye, has arrived in Maine to help scatter Annie's ashes. Maren knows that Skye inherited her mother's view of Haven Point, and that she finds the place - and the people - snobbish and petty. But she also knows that Annie never told her daughter the whole truth about what happened that fateful summer.

Over seven decades of a changing (...)

A Letter to My White Male Friends

by Dax-Devlon Ross

In *A Letter to My White Male Friends*, Dax-Devlon Ross speaks directly to the millions of middle-aged white men who are suddenly awakening to race and racism.

Finally, white men are realizing that simply not being racist isn't enough to end racism. These men want deeper insight not only into how racism has harmed black people, but, for the first time, into how it has harmed *them*. They are beginning to see that racism warps us all. *A Letter to My White Male Friends* promises to help the millions of white men who have said they are committed to change and develop the capacity to see, feel and sustain that commitment so they can help secure racial justice for us all.

In part 1, Dax-Devlon Ross helps readers understand what it meant to be America's first generation raised after the civil rights era. He explains how we were all educated with colorblind narratives and symbols that typically, albeit implicitly, privileged whiteness and denigrated blackness. He provides the context and color of his own experiences in white schools so that white men can revisit moments in their lives where racism was in the room even when they didn't see it enter.

In part 2, Ross shows how learning to see the harm that racism did to him, and forgiving himself, gave him the empathy to see the harm it does to white people as well.

In part 3, he offers white men direction so that they can take just action in their workplace, community, family, and, most importantly, in themselves, especially in the future when race is no longer in the spotlight.

Author Bio

Dax-Devlon Ross has led a career as an educator, non-profit executive, equity consultant, and journalist. After receiving his J.D. from George Washington University, he joined New York City Teaching Fellows. He is the founding Executive Director of After-School All-Stars in New York and New Jersey, and was the winner of the National Association of Black Journalists' Investigative Reporting Award. Currently he is a fellow at Type Media Center. *A Letter to My White Male Friends* is his sixth book.

Dominus

A Novel of the Roman Empire

by Steven Saylor

Following his international bestsellers *Roma* and *Empire*, Saylor continues his saga of the greatest, most storied empire in history from the eternal city at the very center of it

A.D. 165: The empire of Rome has reached its pinnacle. Pax Roma reigns from Britannia to Egypt, from Gaul to Greece. Emperor Marcus Aurelius oversees a golden age and the ancient Pinarius family of artisans embellish the greatest city on Earth with gilded statues and towering marble monuments. But history does not stand still. The years to come bring wars, plagues, fires, and famines. The best emperors in history are succeeded by some of the worst. Barbarians descend, eventually appearing before the gates of Rome itself. Chaos engulfs the empire.

Through it all, the Pinarius family endures, thanks in no small part to the fascinum, a protective talisman older than Rome itself, handed down through countless generations.

But on the fringes of society, a band of troublesome cultists disseminate dangerous and seditious ideas. They call themselves Christians. Some emperors deal with the Christians with toleration, others with bloody persecution. Then one emperor does the unthinkable. He becomes a Christian himself and the revolution he sets in motion will change the world forever.

Spanning 160 years and seven generations, teeming with some of ancient Rome's most vivid figures, Saylor's epic brings to vivid life some of the most tumultuous and consequential chapters of human history, events which reverberate still.

Author Bio

Steven Saylor is the author of the long running *Roma Sub Rosa* series featuring Gordianus the Finder, as well as the *New York Times* bestselling novel, *Roma* and its follow-up, *Empire*. He has appeared as an on-air expert on Roman history and life on The History Channel. Saylor was born in Texas and graduated with high honors from The University of Texas at Austin, where he studied history and classics. He divides his time between Berkeley, California, and Austin, Texas.

Game On

Why College Admission Is Rigged and How to Beat the System
by Susan F. Paterno

In *Game On*, Susan F. Paterno - Director of the Chapman University journalism program and mother of four recent college grads - leads you through the admissions process to help you and your family make the best decision possible.

Is the college admissions game really stacked against you? Is it getting tougher to get into top schools - into any school - or not? How will COVID-19 change all of these things? Susan F. Paterno, a lifelong academic who knows what it takes to get the best candidates enrolled in her institution, answers these pressing issues and many more in *Game On*. Paterno is also a mother who has had to help navigate four very different kids' applications to a wide swath of colleges and to pay for those four-year schools on a finite budget. In her book, she smartly assesses the two poles of the college admissions process: the big picture and the nitty gritty forms-and-scores-and-disclosures. Readers will learn how to use a sorting hat of their own devising - narrowing your focus, knowing how the sausage gets made, and how to find a good financial fit before considering anything else, including geography and reputation (and, certainly, ranking).

Among the tools and insights Paterno offers:

- How to read beyond the rack rate for tuition, room, and board
- How to negotiate your financial package once it's offered
- The difference between family debt and student debt and how to split it
- How to make the fact that schools select their admits with a blend of 90% logic and 10% emotion work for you

The Hitler Years: Triumph, 1933-1939

by Frank McDonough

From historian Frank McDonough, the first volume of a new chronicle of the Third Reich under Hitler's hand.

On January 30th, 1933, Adolf Hitler was appointed the German Chancellor of a coalition government by President Hindenburg. Within a few months he had installed a dictatorship, jailing and killing his leftwing opponents, terrorizing the rest of the population and driving Jews out of public life. He embarked on a crash program of militaristic Keynesianism, reviving the economy and achieving full employment through massive public works, vast armaments spending and the cancellations of foreign debts. After the grim years of the Great Depression, Germany seemed to have been reborn as a brutal and determined European power.

Over the course of the years from 1933 to 1939, Hitler won over most of the population to his vision of a renewed Reich. In these years of domestic triumph, cunning maneuvers, pitting neighboring powers against each other and biding his time, we see Hitler preparing for the moment that would realize his ambition. But what drove Hitler's success was also to be the fatal flaw of his regime: a relentless belief in war as the motor of greatness, a dream of vast conquests in Eastern Europe and anastonishingly fanatical racism.

In *The Hitler Years: Triumph* Frank McDonough charts the rise and fall of the Third Reich under Hitler's through Germany's comprehensive military defeat of Poland in 1939.

A very well-written and lavishly illustrated history on the rise of Hitler (from 1933 to 1939). With an eye for telling detail, McDonough tells the monstrous but well-known story in (...)

The small town of Lake Geneva, Wisconsin is an unlikely location for a Playboy Resort, and nineteen-year old Sherri Taylor is an unlikely bunny. Growing up in neighboring East Troy, Sherri plays the organ at the local church and has never felt comfortable in her own skin. But when her parents die in quick succession, she leaves the only home she's ever known for the chance to be part of a glamorous slice of history. In the winter of 1981, in a costume two sizes too small, her toes pinched by stilettos, Sherri joins the daughters of dairy farmers and factory workers for the defining experience of her life.

Living in the bunny hutch" - Playboy's version of a college dorm - Sherri gets her education in the joys of sisterhood, the thrill of financial independence, the magic of first love, and the heady effects of sex, drugs, and rock and roll. But as spring gives way to summer, Sherri finds herself caught in a romantic triangle - and the tragedy that ensues will haunt her for the next forty years.

From the Midwestern prairie to the California desert, from Wisconsin lakes to the Pacific Ocean, this is a story of what happens when small town life is sprinkled with stardust, and what we lose - and gain - when we leave home. With a heroine to root for and a narrative to get lost in, *Shoulder (...)*

Long Train Runnin'

Our Story of the Doobie Brothers

by Chris Epting, Pat Simmons and Tom Johnston

For the first time, the incredible true story of the legendary band, The Doobie Brothers, written by the founding members.

Only a very few rock bands that have had the longevity, success, and drama of The Doobie Brothers. Born out of late 1960s NoCal, they stood alongside their contemporaries The Grateful Dead, The Allman Brothers, and many others as an iconic American rock band. The train was rolling along, hits were flowing like wine, and arenas were packed with fans who wanted to see them live. . . then Tom Johnston, the band's front man and lead guitarist, almost died.

The Doobies' train came to a screeching halt. All of a sudden the band started contemplating the end of the road only seven years into their career, just as things were taking off.

This was actually far from the end. A soul-steeped backup singer for Steely Dan named Michael McDonald took a shot at singing some of the Doobies' songs on tour, and all of a sudden a new chapter in the Doobie Brothers' story began. The band changed their sound and had numerous number one hits with their new front man. Tom recovered from his health issues, but the band had moved on. When it came time for a reunion concert in the '80s, Tom got the call and was back in the mix. They've been touring ever since and maintain a massive fan base the world over.

Never before have they shared their story, in their own words. In *Long Train Runnin'* they'll change that.

Author Bio

PAT SIMMONS and TOM JOHNSTON are founding members of The Doobie Brothers, 4 time Grammy winners and Rock and Roll Hall of Famers. Their album *Best of the Doobies* has sold more than 12 million copies, achieving the rare Diamond Certification (less than 100 albums have done this).

CHRIS EPTING is an author and award-winning journalist who has written for many publications including *The Los Angeles Times*, *The Wall Street Journal*, and *Loudwire*. His books include *Change of Seasons*, *Adrenalized*, and *Making Waves*.

The Life-Changing Science of Detecting Bullshit

by John V. Petrocelli, Academic

The Life-Changing Science of Detecting Bullshit explains how bullshit works, and how critical thinking skills can be used to successfully detect and thwart its unwanted effects.

Bullshit--that which results from communicating with little to no regard for truth, verifiable evidence, or existing knowledge--is an extremely undesirable social and communicative substance, that can be found in almost every domain of life. Either through social media, real news, fake news, salespeople, or casual conversation with others, people are constantly bombarded with bullshit. Growing interest and concern has recently elevated bullshit and bullshitting to the status of technical, behavioral terms and its very own field of study. It turns out science has some important things to say about these issues, including when bullshitting is most likely to occur, its consequences, and what we can do about it.

The *Life-Changing Science of Detecting Bullshit* will demonstrate for readers how they, and even experts, are susceptible to bullshit and actively engage in bullshitting, and how real-world bullshit artists successfully operate to sell us wine, jewelry, automobiles, and homes. Readers will come to see how the science of bullshit has important applied implications and how fine-tuning their bullshit detectors and becoming more competent disposers of BS can prevent it from wreaking havoc on their lives and relationships.

Author Bio

John V. Petrocelli is an experimental social psychologist and Professor of Psychology at Wake Forest University. His research examines the causes and consequences of BS and BSing in the way of better understanding and improving BS detection and disposal. Petrocelli's research contributions also include attitudes and persuasion and the intersections of counterfactual thinking with learning, memory and decision making. His research has appeared in the top journals of his field including the *Journal of Personality and Social Psychology*. Petrocelli also serves an Associate Editor of *Personality and Social Psychology Bulletin*.

Eloquence of the Sardine

Extraordinary Encounters Beneath the Sea

by Bill Franois

Bill Franois' *Eloquence of the Sardine* is a charming narrative nonfiction book about the secret lives of fishes.

If we listen to the ocean, what do we hear? What can it teach us? How can it change us?

Written by a marine scientist (and winner of French eloquence competitions), this work of narrative non-fiction blends Bill Franois' personal story with that of sea creatures to create an original and exciting work. In poetic prose, he describes his unlikely journey from being a Parisian child, afraid of the water and crippled by self-consciousness, to an eloquent and self-assured young man with a passion for the ocean and all who inhabit it. In doing so, he tells the stories of sardines, anchovies, eels, suckerfish, and whales (to name a few), and demystifies these creatures' fascinating conversations.

A mix between science and storytelling from the past and present, *Eloquence of the Sardine* is an invitation to dive deep and learn from the secrets of the ocean.

A fluid and poetic declaration of love to the world underneath the water." - *Cosinus*

"A magical book." - *TeleZ*

Author Bio

Bill Franois is a physicist passionate about the marine world. He studied at the ENS school in Paris and then devoted himself to research on hydrodynamics. The eloquence contests he won, like the Le Grand Oral on France 2, propelled him to become passionate about his other world: that of words. He mixes these universes to relay the importance of protecting our oceans.

Trial by Fire

A Novel

by P. T. Deutermann

Based on a true story - a dramatic WWII novel of attack, survival, and triumph on board an aircraft carrier in the Pacific.

March 19, 1945: The war in the Pacific approaches its apocalyptic climax. The largest wartime armada ever assembled, Task Force 58, is closing in on Okinawa; once taken, it will finally put American B-29 bombers in range of the home islands of Japan - and victory.

At the heart of the fleet are 14 Essex-class aircraft carriers, including the *USS Franklin*, known as "Big Ben" - a 27,000-ton behemoth, home to 3,500 crewmen and 100 aircraft. Just after dawn, while crewmen prepare for battle, a single Japanese *Yokosuka D4Y* breaks through the clouds and drops two 500-pound bombs on Big Ben. The first rips through the flight deck's 3-inch armor to the hangar deck, exploding amidst two dozen planes carrying 36,000 gallons of gas and 30 tons of explosives. Rockets and bombs howl in all directions. Hundreds of men are forced to leap into the sea to escape, leaving the captain with only one third of his crew; there are more dead, wounded, and trapped men left onboard than able-bodied sailors.

Trial By Fire by P.T. Deutermann is the gripping novelization of how, against all odds, the sailors of the *Franklin* were able to save their ship, after 3 agonizing days of battling the flames that ultimately claimed the lives of 832 men and injured 300 more. Readers will be astounded and humbled by the heroic actions of a few brave sailors in the face of catastrophe.

Author Bio

P. T. DEUTERMANN is the author of many previous novels including *Pacific Glory*, which won the W. Y. Boyd Literary Award for Excellence in Military Fiction. Deutermann spent twenty-six years in military and government service, as a captain in the Navy and in the Joint Chiefs of Staff as an arms-control specialist. He lives with his wife in North Carolina.

Golden Boy

A Murder Among the Manhattan Elite

by John Glatt

New York Times bestselling author John Glatt tells the true story of Thomas Gilbert Jr., the disturbed young man accused of murdering his father, a Manhattan millionaire and hedge fund founder.

By all accounts, Thomas Gilbert Jr. led a charmed life. The son of a wealthy hedge fund manager and a financier, he grew up surrounded by a loving family and all the luxury an Upper East Side childhood could provide: education at the elite Buckley School and Deerfield Academy, summers in a sprawling seaside mansion in the Hamptons. He was strikingly handsome, moving with ease through glittering social circles and following in his father's footsteps to Princeton. His friends saw him as a leader; his parents adored him.

But Tommy always felt different, and the cracks in his facade began to show. What started as quiet exhaustion turned into warning signs of OCD, increasing paranoia, and - most troubling - an indescribable, inexplicable hatred of his father. As his parents begged him to seek psychiatric help, Tommy pushed back by self-medicating with drugs and escalating violence. When a fire destroyed his recently-estranged best friend's Hamptons home, Tommy was the prime suspect - but he was never charged. Just months later, he arrived at his parents' apartment, calmly asked his mother to leave, and shot his father point-blank in the head.

Now, journalist John Glatt takes an in-depth look at the devastating crime that rocked Manhattan's upper class. With exclusive access to sources close to Tommy, including his own mother, Glatt constructs the agonizing spiral of mental illness that led Thomas Gilbert Jr. to (...)

The Devil's Dictionary

by Steven Kotler

***New York Times* bestselling author Steven Kotler's follow up to *Last Tango*, a near-future thriller about the evolution of empathy in the tradition of William Gibson and Neal Stephenson.**

Hard to say when the human species fractured exactly. Harder to say when this new talent arrived. But Lion Zorn, protagonist of *Last Tango*, is the first of his kind - an empathy tracker, an emotional soothsayer, with a felt sense for the future of the we. In simpler terms, he can spot cultural shifts and trends before they happen.

The Devil's Dictionary finds Lion Zorn enmeshed with a strange subculture: polyamorous crypto-currency fiends with a tendency toward eco-terrorism. These crypto-eco-punks have executed the largest land grab in U.S. history, buying up huge swatches of the American west to establish the world's first mega-linkage. This unbroken tract of wild lands stretching from Yellowstone to Yukon is meant to protect biodiversity and stave off the Sixth Great Extinction, but something's rotten in Eden. Instead of saving existing species, exotic creatures unlike anything seen on Earth keep turning up. Called in to track down the origin of these exotics, Lion quickly finds himself entangled in a battle for the survival of our species

A Thriller

by Ben Coes

CIA operative Dewey Andreas is America's last line of defense when terrorists take over Manhattan, targeting the U.N. and the President himself in the latest in this *New York Times* bestselling series.

America is about to face the deadliest terrorist attack on its soil since 9/11. Iran has been planning a revenge attack for years, with three goals in mind. Bring America to its knees. Assassinate the popular U.S. President J. P. Dellenbaugh. And neutralize their most successful agent, Dewey Andreas.

The first pre-emptive attack against Dewey Andreas fails but it worries the head of the CIA enough that he sends Dewey out of town and off the grid. But as intelligence analysts work as fast as they can to unravel the chatter on terrorist networks, Muhammed el-Shakib, head of Iran's military and intelligence agency, launches a bold strike. When the President arrives in New York to address the U.N., embedded terrorist assets blow up the bridges and tunnels that connect Manhattan to the mainland. Taking control of the island with its hidden forces, they race to the U.N. in search of Dellenbaugh and to launch an even deadlier attack that will wreak unimaginable destruction on the country itself.

While a shocked country struggles to mount a counter-attack, a hopeless, outmanned and outgunned Dewey Andreas sneaks onto the island of Manhattan to fight a seemingly impossible battle.

The Ambassador

Joseph P. Kennedy at the Court of St. James's 1938-1940
by Susan Ronald

Acclaimed biographer Susan Ronald reveals the truth about Joseph P. Kennedy's shockingly controversial tenure as Ambassador to Great Britain on the eve of World War II.

On February 18, 1938, Joseph P. Kennedy was sworn in as US Ambassador to the Court of St. James. To say his appointment to the most prestigious and strategic diplomatic post in the world shocked the Establishment was an understatement: known for his profound Irish roots and staunch Catholicism, not to mention his plain-spoken" opinions and womanizing, he was a curious choice as Europe hurtled toward war.

Initially welcomed by the British, in less than two short years Kennedy was loathed by the White House, the State Department and the British Government. Believing firmly that Fascism was the inevitable wave of the future, he consistently misrepresented official US foreign policy internationally as well as direct instructions from FDR himself. The Americans were the first to disown him and the British and the Nazis used Kennedy to their own ends.

Through meticulous research and many newly available sources, Ronald confirms in impressive detail what has long been believed by many: that Kennedy was a Fascist sympathizer and an anti-Semite whose only loyalty was to his family's advancement. She also reveals the ambitions of the Kennedy dynasty during this period abroad, as they sought to enter the world of high society London and establish themselves as America's first family. Thorough and utterly readable, *The (...)*

The Source of All Things

A Heart Surgeon's Quest to Understand Our Most Mysterious Organ
by Reinhard Friedl

In the tradition of Henry Marsh's *Do No Harm*, a heart surgeon's personal investigation of the human heart, moving from his riveting clinical experiences to a more poetic understanding of its workings

The heart is our most important organ. Yet despite that it has not changed since the appearance of *Homo sapiens* 300,000 years ago, it is also our most mysterious. In most human cultures, it is seen as the source of love, sympathy, joy, courage, strength and wisdom.

What if the heart could answer questions neurosciences can't begin to? Having witnessed the extraordinary complexity and unpredictability of human hearts in the operating theatre--each one individual, like a fingerprint--heart surgeon Reinhard Friedl looked again at this "primitive pump" to reconcile it with his experiences from thousands of heart operations.

In this book, he presents findings from various scientific disciplines, such as secret connections of the heart and brain and their influence on emotions and consciousness. He reveals the miracle that is the heart that we speak about so often yet is strangely foreign to many human beings.

Full of compelling patient stories, *The Source of All Things* ends with a plea: that we recognize the heart's wisdom and adopt a more heart-centered way of living, leading to greater health and more joy.

Author Bio

The Real Valkyrie

The Hidden History of Viking Warrior Women

by Nancy Marie Brown

In the tradition of Stacy Schiff's *Cleopatra*, Brown lays to rest the hoary myth that Viking society was ruled by men and celebrates the dramatic lives of female Viking warriors

In 2017, DNA tests revealed to the collective shock of many scholars that a Viking warrior in a high-status grave in Birka, Sweden was actually a woman. *The Real Valkyrie* weaves together archaeology, history, and literature to imagine her life and times, showing that Viking women had more power and agency than historians have imagined.

Brown uses science to link the Birka warrior, whom she names Hervor, to Viking trading towns and to their great trade route east to Byzantium and beyond. She imagines her life intersecting with larger-than-life but real women, including Queen Gunnhild Mother-of-Kings, the Viking leader known as The Red Girl, and Queen Olga of Kyiv. Hervor's short, dramatic life shows that much of what we have taken as truth about women in the Viking Age is based not on data, but on nineteenth-century Victorian biases. Rather than holding the household keys, Viking women in history, law, saga, poetry, and myth carry weapons. These women brag, "As heroes we were widely known--with keen spears we cut blood from bone." In this compelling narrative Brown brings the world of those valkyries and shield-maids to vivid life.

"This haunting account provides yet more evidence not only of the power of (...)
