### **Cheyenne**

by Valerie Bodden

Prior to the arrival of Europeans, numerous native peoples thrived across North America. Providing an overview of daily life and culture, this series introduces six more First Peoples. Approachable text examines each group's community structure, significant ceremonies, and traditions, as well as their relationship with European settlers and forced relocation onto reservations. With a focus on the tribe's way of life, each title also includes a traditional story and tells how the people work to keep the traditions of their ancestors alive today. An introduction to the Cheyenne lifestyle and history, including their forced relocation and how they keep traditions alive today. A Cheyenne story recounts how people became chief of the animals.

## Chickens

by Lori Dittmer

Grow with Me peers under the ground, into trees, and elsewhere in nature to explore the lives and growth of an assortment of creatures and plants. These books for ages eight and up offer elementary but fascinating studies of the life stages that bugs, animals, and vegetation experience as they mature. Magnified photos, easy-to-follow text explaining life stages, and a life-cycle recap all contribute to an educational experience focused on an up-close look at how the featured creature or plant changes and grows throughout its life. An explanation of the life cycle and life span of chickens, using up-close photographs and step-by-step text to follow a chicken's growth process from egg to chick to mature chicken.

## Autonomous Vehicles

by Jim Whiting

In a world permeated by technology, we sometimes struggle to keep pace with an ever-changing landscape. With historical and full-color photographs complementing documentary texts, *Odysseys in Technology* invites advanced readers along on a journey to experience the development of key technological innovations like never before. These titles feature a sophisticated design peppered with arresting photographs that illustrate important scientific principles, contributions of notable individuals and companies, common applications of the technology, and influential figures poised to lead the field into the future. Side panels, colored callouts, and primary-source quotations assist in making the text accessible to a wide range of learners. An in-depth survey of autonomous vehicles, examining the past, present, and future of the technological developments, scientific principles, and innovators behind driverless vehicles.

Hello, freight trains and trams. Hello, monorails and passenger trains. Hello, ... fun! The popular Seedlings series now offers irresistible introductions to six types of trains. Written in a friendly voice, filled with dynamic photos, and featuring text crafted for the youngest of readers, these newest books touch upon the parts and roles of trains in communities. Each book closes with a labeled-image guide for further review. As introductions to informational text, these titles will plant the seeds of knowledge! A kindergarten-level introduction to monorails, covering their drivers, role in transportation, and such defining features as their single-rail tracks.
