**A passionate attack on the monopolies that are throttling American democracy.**

Every facet of American life is being overtaken by big platform monopolists like Facebook, Google, and Bayer (which has merged with the former agricultural giant Monsanto), resulting in a greater concentration of wealth and power than we've seen since the Gilded Age. They are evolving into political entities that often have more influence than the actual government, bending state and federal legislatures to their will and even creating arbitration

**A new history of the war demagogues have waged throughout American history, from the Founders to Trump**

As President, Donald Trump has made a habit of undermining democratic institutions. He constantly attacks the free press as fake news. Ask any liberal - and many moderate conservatives - and they'll tell you that Donald Trump is a threat to the rule of law as delineated by the U.S. Constitution. Mainstream media outlets have gleefully reported fresh examples of alleged executive overreach or authoritarian rhetoric nearly every day of his presidency. In the 2020 primaries, the candidates seem to be competing over who can paint the most frightening picture of how

After the fall of the USSR in 1989, the world thought that the flawed ideology of socialism was defeated forever. And for a while, it seemed to be true. But socialism survived in the rarified sector of the academy and it has now been injected once again into mainstream Democratic politics by a coalition of the old and new generations of the left (...)
