COLLAGE

CHRONICLE BOOKS

FALL 2023

where it all began

Petit Collage is all about good design. We combine a modern aesthetic with a focus on using sustainable materials, to create thoughtful products for little ones.

Our products combine high quality design with high play value, and look as beautiful on their shelf as they are fun for our children to play!

Our first product, back in 2006, was a hand-crafted little owl collage made from recycled materials. That product inspired not only our company name but our sustainability ethos.

our awards

We strive to handcraft our goods in a sustainable way, using the best quality, most eco-friendly materials available. Our "eco-friendly" icon can be found in our catalog and on our packaging.

our sustainability mission

Eco Team

We have a dedicated team reviewing all Petit Collage products, with a specific goal: to make them more sustainable and reduce their negative impact on our planet.

Safety

The safety of our products is our highest priority. Every Petit Collage product is thoroughly risk assessed and third party tested. You can rest assured that our products are designed with your child's safety at the forefront.

Our Factories

We care how and where our products are made and we ensure all our suppliers have a valid and in-date full ethical audit report.

Responsibly Sourced

We prioritize the use of responsibly sourced materials, such as recycled card, FSC wood and FSC paper, GOTS certified organic cotton, vegetable or soy inks and water-based paints.

Transit

We have made it a priority to reduce overall packaging size and material use, thus improving shipping efficiency. Plus, continually improving timeline management ensures we rarely need to air freight Petit Collage products around the world.

Revised Packaging

We have significantly reduced single use and disposable plastic waste from our product packaging and our transit packaging. Where we're finding plastic difficult to remove, we're working to provide recycled and recyclable options that have less of an ecological impact. Ultimately, we aim to remove plastic entirely.
