A new exploration of the area between life and death

In *Near-Death Experiences*, Anthony Peake looks at the workings of the brain and the physiological events associated with a seemingly inexplicable state. Marrying anecdotal and empirical evidence, he discusses the latest theories and how to reconcile an apparent awareness in a subject with the fact that clinically the person is considered to be 'dead' with no signs of bodily function. It makes for a fascinating read that takes us into an area of neuroscientific research that is continually evolving.

For Alexander Marshal (c.1620–82), the cultivation of rare plants was essential to the study of the natural world. His interest was stimulated by specimens imported to England from the Near East and the New World in the 17th century. The 44 illustrations in this new colouring book are taken from the 'florilegium' (flower book) compiled by Marshal. Many are exotic newcomers; others native plants. Marshal was not a professional artist, but his florilegium – the only English flower book to survive from the period – contains some of the most beautiful plant studies in botanical art. The artworks were drawn to be studied and enjoyed by his friends and fellow horticulturalists.

HISTORY

The indoctrination of a generation

In this fascinating text, Julian Flanders examines the impact of the Hitler Youth Movement on Germany's young people and society as a whole. By 1940 membership reached 8 million – over 90 per cent of German children. Between 1933 and the outbreak of World War II in 1939, the movement drove a wedge between youth, the educational system and even their own dissenting families, producing a generation of anti-intellectuals indoctrinated with Nazi ideology. On the eve of war, the Hitler Youth constituted the single most successful mass movement in the Third Reich and comprised many of its most committed Nazis.

The *Arcturus Illustrated Classics* series brings together high-quality hardback editions of beloved works of fiction, illustrated with specially commissioned artworks to illuminate the text. Together, they make a wonderful collection that is perfect for any home library.

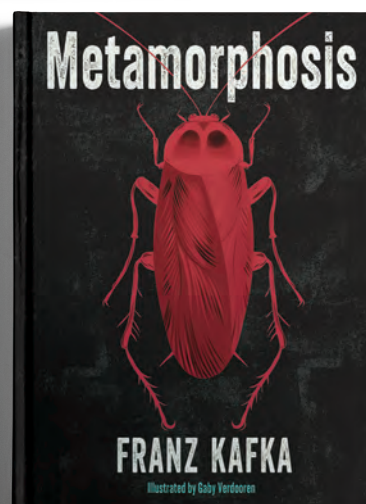

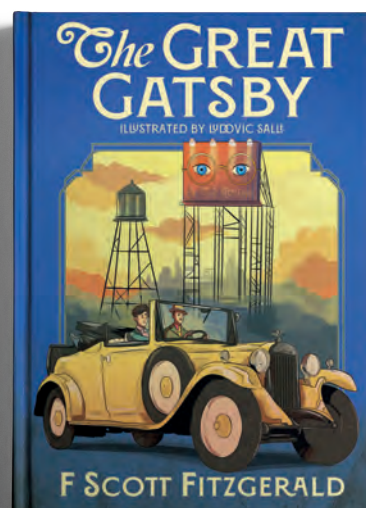

A paragon of the Great American Novel, *The Great Gatsby* is a tragic love story which captures the hollow decadence of the Jazz Age. As events unfold, both Gatsby and narrator Nick are forced to confront the rot beneath the shiny surface of high society and the unreality of the American dream.

First published in 1891, *The Picture of Dorian Gray* tells how handsome Dorian Gray wishes that his portrait should age rather than himself, and then launches on a life of excess and depravity.

Metamorphosis is a masterful mix of horror and absurdity, the story of travelling salesman Gregor Samsa, who wakes up one day to find that he has turned into a giant insect.

In *Frankenstein*, the hideous monster born of Frankenstein's experiment wreaks havoc when it realises that it will never know the happiness that mere mortals can enjoy.

Lastly, *Pride and Prejudice*, Jane Austen's classic tale of love overcoming preconceptions, centres on the two eldest daughters of the Bennet family, Jane and Elizabeth, and their rocky and often hilarious path to finding true love.

£9.99 Paperback

9781398834552

From the late 1890s to the early 1900s, the writer and traveller Richard Gordon Smith spent nine years in Japan. His main purpose was the collection of historical objects for display at the British Museum. The research brought him into contact with Japanese people from all walks of life and he collected with enthusiasm the stories and folklore that they told him.

The 57 tales in this collection include stories about love and passion, ghosts and gods, mountains, trees and flowers, history and legend. They reflect Japan's history as a warrior nation with stories of the samurai and other fighters, and their heroic deeds and codes of honour.

Written in Gordon Smith's engaging style, these stories are an enticing introduction to Japanese tradition and mythology.

One of Ireland's greatest writers, W. B. Yeats was fascinated by the myths and folklore of his native country. Compiled by Yeats in 1892, these stories were collected around the country by a variety of historians, including Lady Wilde, the mother of Oscar Wilde.

Within these pages, you'll discover tales of greedy sons who get their comeuppance, canny priests, evil witches and demons, alongside legends of heroic kings, giants and, of course, the good folk themselves – the fairies, the leprechauns and the cluricauns.

By turns, charming and scary, these are yarns that have passed down through generations and which are still as entertaining and magical as when they were first recalled.

Beautifully designed Circle Classics for everyone to enjoy

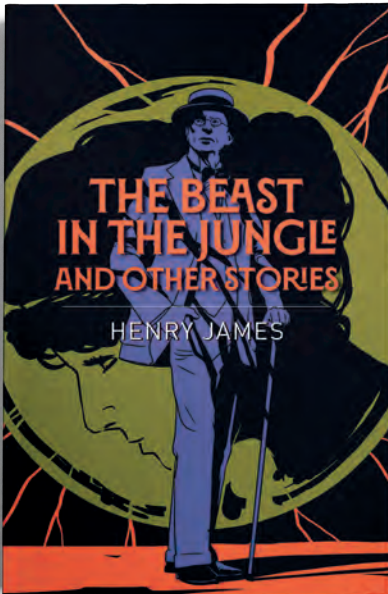

This captivating collection includes an array of fascinating books published over the last few centuries. They include Gilbert Burnet's translation of Thomas's More's *Utopia* (1515), James Malcom Rymer's *The String of Pearls* (1846), and Edith Wharton's *The Age of Innocence* (1920).

Edith Wharton's *The Age of Innocence* is a sparkling novel about Gilded Age New York where one of high society's most eligible bachelors battles his feelings for the unconventionally free-spirited Countess Ellen Olenska. Recently returned to America and seeking a divorce from her aristocratic husband, Ellen is tainted by her failed marriage and must fight against the rigid social conventions that govern those around her. Newland Archer, a charming lawyer, is engaged to Ellen's cousin May Welland but soon realises that his marriage is a submission to the prejudices of society.

First published in 1912, Edgar Rice Burroughs's *A Princess of Mars* introduces John Carter, a Virginian soldier who is transported to Barsoom (known to humans as Mars). In a daring adventure, Carter must win over the Tharks who are native to the land while attempting to free their captive, a beautiful princess.

Utopia was one of Thomas More's seminal works. More, who was eventually executed by King Henry VIII for his opposition to certain of the king's policies, writes about an ideal society that is based on democracy, religious tolerance and

prosperity. More than four centuries after it was penned, *Utopia* is an insightful read that tells us just as much about today as it does about Tudor England.

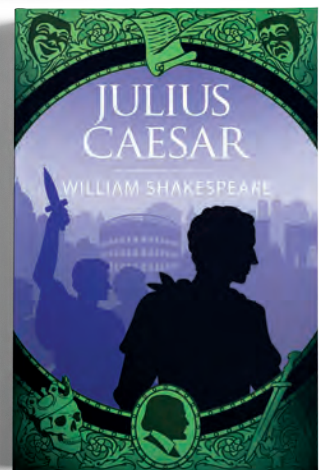

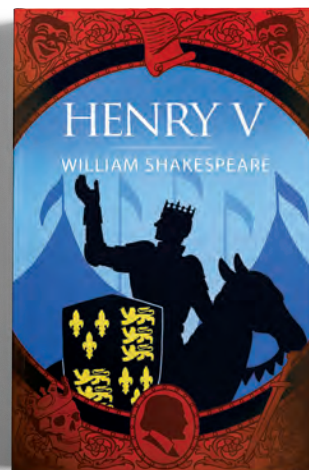

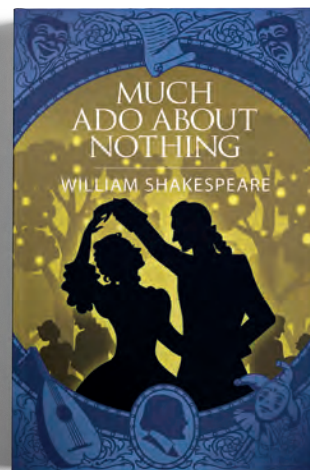

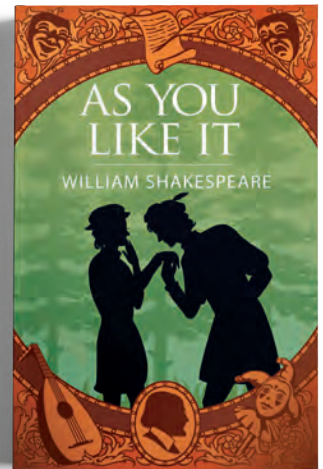

Other new titles include Olaf Stapledon's *Last and First Men* (1930) and James Malcolm Rymer's *Sweeney Todd: The String of Pearls*.

You'll also need to brace yourself for Rymer's macabre tale of deceit and retribution – the novel that marked the literary debut of the infamous demon barber, Sweeney Todd. Stapledon's science fiction novel *Last and First Men* shares an extraordinary account by 'one of the last men' – an unknown narrator who documents two billion years of history from the distant future. First published in 1930, this is a text unparalleled in its anticipation of human evolution, genetic engineering and contemporary technologies.

The Beast in the Jungle and Other Stories presents some of Henry James' most thought-provoking works. *The Beast in the Jungle* is a deeply introspective novella that raises important questions about friendship, fate and free will. Also included are short stories 'The Altar of the Dead', 'The Way it Came' and 'A Private Life'.

Friedrich Nietzsche's groundbreaking *The Twilight of the Idols and The Antichrist* and Swami Paramananda's *The Upanishads* are both fascinating commentaries on philosophy and spirituality.

Plus there are new additions to our Shakespeare plays series that include some of his finest romantic comedies and histories. *As You Like It* and *Much Ado About Nothing* illuminate the language and lessons of love; while *Henry V* and *Julius Caesar* put forth some of the bard's most powerful words on leadership and loyalty.
